

HACK CLUB

Rome wasn't built in a day,

but your circuit board could be.

Hack Club is a 501(c)(3) nonprofit where teenagers build awesome projects together!

High schooler? Get a \$100 grant to build your own custom PCB.

Printed Circuit Boards (PCBs) are the core component of all electronics. Learn PCB design and build your own robots, radios, and electronics!

“I’m so glad young people can create PCBs online. May your creativity change the world! Mine did.”

Steve Wozniak, Apple co-founder
